Custom Billiard Table from our Mountain Modern Collection

Featured in this newsletter is a uniquely modern custom billiard table recently installed for a client in Wyoming.

This table is supported by a 3-piece X-style base, giving it an airy suspended appearance. The base was reinforced by a steel subframe.

The project included a custom 8-ball rack in walnut, and custom iron bridge stick, (not shown).

Although several of our recent pieces in the Mountain Modern Collection, have been built in walnut, this table was built from rift oak, with a custom stain.

Similar designs could also be built in alder or other woods. The finish can be smooth or distressed, depending upon client preferences.
