New and Custom Pieces from The Mountain Modern Collection

The Mountain Modern Collection has been quite popular with interior designers and their clients.

This newsletter features several of the latest game tables and other custom items Drawknife has built in this new style.

Due to special requests, many of these custom pieces were built in walnut and rift-oak, although similar designs could also be built in alder or other woods.

In addition to our usual billiard tables, we have also completed a 2 in 1 poker table, and a ping-pong table, (shown lower right).

The pictures at right show the poker table with its poker top, including charcoal felt and dark blue leather chip places. The top reverses to a dining top, (lower photo). The finish can be smooth or distressed, depending upon client preferences.
