## Custom Game Furniture

Since the introduction of the American Prairie Collection, Drawknife Billiards has been able to expand our ability to respond to a wider variety of requests for custom game room furniture.

The Basic pieces are built in a simple style that allows the beautiful wood grain of the Knotty Alder to take center stage. But with the addition of panels on the body and legs, as well as other trim additions, each piece can become a part of a unique family game room.

With Foosball, Air Hockey, Shuffleboard, Poker and, of course, Billiard tables in several styles, Drawknife Billiards can assist you in designing the perfect family game room. to please both adults as well as young people.

In the past few months, we have had requests to build a few unusual game tables. As a result, we have built an outdoor Ping-Pong table in the Standard Yellowstone style, as well as a custom bumper shuffleboard table in our American Prairie style.

The Ping-Pong table, as shown below, is based upon the design of our Targhee billiard table, with some trim boards added on the body. Since it was to be installed on a covered patio, we added a special finish to help protect it from the elements.

The bumper shuffleboard, and its matching billiard table, (shown below at left), include wood-paneled corners on the body of both tables and pyramid style clavos on the table aprons.

The project included iron hooks, designed to be attached to the sides and end of the billiard table to hold the custom iron bridge and ball triangle.
